DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the **"a water supply connected to a pump"** must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-3,6,7,8,10,11 & 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weiner (US Patent No. 3,017,888) in view of Lerner (US Patent No. 5,956,963). Weiner discloses a wearable garment apparatus for cooling and comprising: an inner sheet (2) with a flexible liquid absorbent material that is capable of performing as an evaporation zone, an outer flexible sheet (3), means for transporting cooling liquid, and a wicking cord (8) form of synthetic hydrophobic nature. Furthermore a flexible bag (13) containing a body of water (15) and the mask is made of a plastic which is inherently water-proof (see column 2). Weiner lacks an elastic mean for providing tension. Lerner teaches a wrist cooler with stretchable elastic features to conform to the body of a wear. It would have been obvious to one having ordinary

skilled in the art to modify the disclosed invention with an elastic means as taught by Lerner to secure a wearable cooler to a body and provide a firm contact surface.

Claims 9,18,19 & 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weiner in view of Lerner as stated above as applied to claims 1,3,6 & 7 above, and further in view of Junkins (US Patent No. 6,715,309). Junkins further teaches a pump (61) for moving cooling fluid with a water cooling system. It would have further been obvious to modify the disclosed invention with a pump for transporting cooling fluid from storage area to a surface of the body requiring cooling.

Allowable Subject Matter

Claims 4,5,12-14 & 16-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
